Company Profile

Established in 1991 in the heart of Jordan's urban development, **Dajani Agribusiness** is an award-winning landscape architecture company founded by Engineer Maher Dajani after a captivating mentorship in fruit and ornamental trees throughout Europe.

During our journey, we proudly emerged as trailblazers in the field of landscape design in Jordan, providing innovative and modern services encompassing both hardscape and softscape design.

Dajani Agribusiness provides eco-conscious services in the design and implementation of lighting and irrigation systems. Our expertise covers a wide range of projects, including small residential properties, malls, banks, parks, and resorts, both locally and internationally. However, our offerings extend beyond that. We also specialize in Plantscaping, Banqueting, Fruit trees, Fresh-line, Project management, as well as Renovation & Remodeling.

Dajani Agribusiness leverages the collective expertise of our skilled team comprising designers, landscapers, and horticulture experts. With seamless collaboration, we integrate all project components for the successful construction of landscaping projects.

Landscape Design

We continuously strive to achieve a perfect blend of comfort and luxury, practicality and desirability, making our exceptional designs exclusive to the space at hand. Design encompasses more than just aesthetics and sensations; it encompasses functionality and efficiency.

Throughout the years, the design team at Dajani Agribusiness has acquired a wealth of knowledge, discovering numerous ingenious techniques and creative concepts to personalize projects of any size, transforming them into distinctive havens that reflect your individuality.

Our unwavering dedication to meticulousness, spanning from initial design to ongoing maintenance, establishes Dajani Agribusiness as the ultimate destination for all your landscape endeavors, regardless of their scope or magnitude.

Our good experience starts from an excellent design stage and ends with a high quality maintenance stage.

Soft Landscape

With a keen eye for plant selection, arrangement, and horticultural expertise, we bring life and beauty to every project. Through the careful integration of trees, shrubs, flowers, and grass, we transform ordinary landscapes into stunning havens of color, texture, and tranquility. From creating lush garden beds and charming flower borders to designing inviting lawns and captivating vertical gardens, I strive to craft landscapes that reflect my clients' vision while harmonizing with the natural surroundings.

Hardscape and Wood Works

Design goes beyond aesthetics; it encompasses functionality. By defining your outdoor space and achieving symmetry between the house and garden through the use of hard elements, we enhance the overall design. Landscaping encompasses not only the enjoyment of living elements in nature but also the incorporation of non-living elements such as stone and wood, allowing us to appreciate their beauty. Add distinction to your landscape with pavers, stone-scapes, and outdoor structures. When designed with vision and style, hardscapes provide functionality while enhancing the architectural beauty of your home within the outdoor environment.

Lighting System

We guarantee a stunning garden that exudes beauty and charm throughout the year, both day and night. With our comprehensive garden services, we handle every aspect, ensuring a seamless experience from start to finish.

By incorporating outdoor lighting, we have the power to transform your property into an enchanting spectacle after sunset, accentuating notable features such as conversation areas, fountains, and pathways. In addition to its aesthetic value, evening lighting serves as a crucial safety measure, illuminating paths and enabling year-round enjoyment of your garden.

Irrigation System

Dajani Agribusiness has embraced the use of smart irrigation systems, acknowledging the advancements in irrigation technology and practices.

These systems not only promote the growth of abundant and superior-quality plants but also achieve this outcome while conserving water. Designed for minimal maintenance, these installations provide a hassle-free experience. By incorporating automated systems, we enhance the benefits of irrigation, ensuring high efficiency and optimal results.

Aquascape and swimming pools

The natural sound of water is a well-known stress reliever and its relaxing effect can transport you to a different place.

We are specialized in the design and installation of swimming pools, water pathways, and all kinds of water features like waterfalls, wet walls, streams, cascades fountains and ponds that drown out the hum of traffic and attract wildlife like birds and butterflies that bring natural beauty and their own unique sounds into your environment.

Turn your backyard into a peaceful retreat with the soothing sound and movement of water. Whether it's a waterfall, pond, stream, fountain or a swimming pool, we can help you create a slice of paradise in your own backyard.

Plantscaping and Banqueting

Interior landscaping is far more than the placement of indoor plants. It is a strategic pillar of architecture, designed to accentuate various aspects of spatial design.

Our comprehensive services encompass interior and exterior design, covering all aspects of your event or space to bring forth a lush and enduring vision. As a dedicated team, we enhance the design further by curating a selection of distinctive and unique plant varieties, incorporating landscape strategies that account for temperature and climatic conditions.

Residential Project

2014-2015 | Dabouq

The Kevorkian Residence

A successful landscape design incorporates the elements of nature, functionality, and aesthetic appeal into a practical and visually pleasing concept. In modern practice, landscape design serves as a connection, bridging the realms of landscape architecture and garden design.

Dajani Agribusiness undertook a transformation process for the Kevorkian residence in Dabouq, optimizing its vast but underutilized space to enhance functionality and effectiveness. Through a comprehensive site analysis, consideration of utility requirements, space distribution, and desired functions, an action plan was developed and executed. The strategy encompassed various elements such as sitting areas, water features, sun and shade distribution, and color management.

Jordan is blessed with a pleasant weather cycle. In general, dry summers & temperate winters facilitate many unique natural resources that can be developed and utilized in the landscape industry.

At Dajani Agribusiness, our team of landscape designers and contractors offer a diverse range of quality materials and services that elevates garden care. We possess a profound understanding of horticulture, including agronomy; botany; physiology and agriculture. This expertise has established us as leaders in our field.

This nuanced foundation of knowledge and experience is a powerful tool in manifesting the creative vision of our projects, from a simple backyard garden to corporate & touristic scale projects.

Fine ART. Unique TASTE. Vast EXPERIENCE. Invest in Dajani Agribusiness to sculpt your idyllic space.
